October 2024 - Present

Company: SkySoft

Ecommerce Algreen

Developed and maintained an e-commerce platform specializing in the sale of door features and related products.

Technologies: **TypeScript, Express.js, MongoDB**

March 2023 - Present

Company: SkySoft

Konfigurator Algreen

Contributed to the development of the Door Configurator application, designed to empower users to create custom-designed doors visually. Played a pivotal role in enabling users to design doors by selecting models, specifying sizes, and adding features such as spy holes, door handles, and glass options. Focused on creating an intuitive and user-friendly interface, ensuring that users could easily configure doors with desired shapes and dimensions. Implemented functionality to allow users to submit door configuration data directly to the store, streamlining the order process and enhancing customer convenience.

Technologies: **React, Redux, Redux-Thunk, TypeScript, Tailwind, Laravel, MySQL**

February 2019 - Present

Company: SkySoft

Internal Algreen

Retail management system for product inventory, transfers, purchases, and sales. Worker wage calculation tool, supporting Excel file uploads with hourly rates. Invoicing and salary calculation capabilities with print options. Integration with eFaktrue portal for QR code-enabled bill printing. Utilizes Chart.js for tracking company progress. Employs DataTables (jQuery JavaScript library plugin) for advanced HTML table features. Facilitated data exchange by implementing XML for sending and receiving data, ensuring efficient communication within the system.

Technologies: **JavaScript, JQuery, SCSS, Bootstrap, Laravel, PHP Intervention Image, MySQL**

January 2024 - October 2024

Private project

E-Gradiliste

This application is designed to automate the creation of construction documentation. It serves as a tool for construction workers to efficiently manage and print their site plans, books, and journals. By streamlining the documentation process, it enables construction teams to maintain organized records and enhance productivity on-site.

Technologies: **Next.js 14, Tailwind, Yup, Formik**

April 2022 - March 2023

Company: SkySoft - Sirmia

Zen

Contributed to the development of "Zen," a TV application with a primary focus on broadcasting sports, anime, movies, and music content. Worked on the initial phase of the application, aiming to create an experience similar to the Netflix application. Implemented key navigation functionality using the Norigin Spatial Navigation library, ensuring smooth remote navigation for browser-based smart TVs. Collaborated on enhancing the user interface and overall user experience for seamless content consumption.

Technologies: **React, TanStack Query, Redux, Tailwind, Firebase, Gerrit**

September 2021 - March 2022

Company: SkySoft - Konova

Konova E-Mitwirkung

Developed smart processes and digital solutions to facilitate efficient dialogue processes for public administrations, including municipalities, cities, and cantons.

Technologies: **React, TanStack Table, TypeScript, Storybook, Docker, SCSS, Jira**
